ADD VALUE  
TO YOUR  
RESIDENTIAL  
PROJECT

## Double Glass

Creates a better comfort system for acoustic and thermal insulation.

- Thermal: Reduces heat transmission to the interior of the home.
- Acoustic: Spaces where you prefer to control outside noises (Example: Bedroom, study, room)

## LATCHES

Provides better security by preventing the window from opening from the outside.

Anti-false mechanism maneuver that prevents system mismatch

Wide versatility in styles, colors and colors, meets a better aesthetic

## THERMAL BREAK

Maximize energy savings, avoid condensation, a sustainable system.

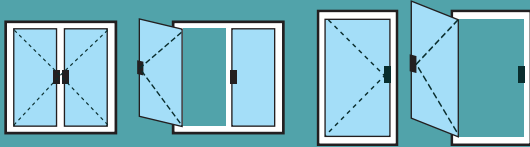

## MULTIPOINT LATCHES

European security clasp that provides maximum security.

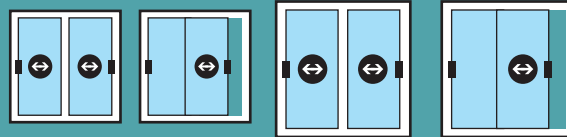

# LEARN MORE ABOUT OUR SYSTEMS

## CASEMENT

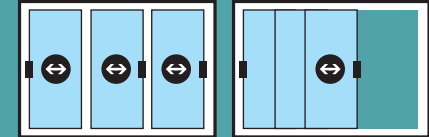

Open your windows both ways. Total ventilation and easy cleaning. A design that improves tradition

## SLIDING

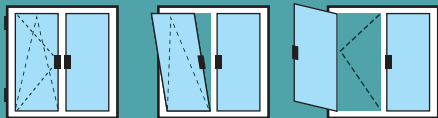

A solution of spaces. Bidirectional movement that preserves the possibilities of total ventilation

## POCKET SLIDER

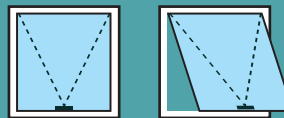

Maximize the use of spaces with this version of bidirectional panels

## TILT & TURN

Unique and innovative design. It allows traditional swing opening, if you require little ventilation it is deployed inside your home.

## AWNING

External projection mechanism. Allows simultaneous protection and ventilation in case of rain.

## FIXED

Fully illuminate your interior spaces and admire the exterior that surrounds you. Ideal for panoramic places that do not require ventilation.
